«Energy security» special

The practical special in «Handelszeitung» on 21 September 2023

Characteristics

The war in Ukraine marks a turning point for the supply of energy in Europe. In this environment, how can Switzerland guarantee security of supply for the economy and for private consumers? And how can we manage climate change while also becoming more independent? With this new situation in mind, can we make the transition to a renewable and secure energy supply?

The seven specials on the topic of «Energy» shed light on the challenges facing the industry from a wide range of perspectives and show current trends and possible solutions.

The «Energy Security» special on 21 September focuses on: How can we achieve security of supply at fair prices? How stable is the security of supply with renewable energies and how can we continue to work reliably with other countries in Europe? What roles will coal, oil and nuclear power play in the future? Readers will find answers and advice in the special supplement.

Register your advertisement for the special now and draw attention to your services and products! All specials are also published in digital format at handelszeitung.ch/specials. Here you will also find relevant advertising in the field and more advice from us.

Pricing

Page format	Width x height mm	Gross price CHF 4c
